

Dr. Wooten performed my breast augmentation. I am the mother of two and I nursed both of my children for about a year each. While I was never large breasted, they had been firm and placed appropriately. After nursing both of my boys, my breasts were flat and droopy. I am thin and didn't have any cleavage at all. I had to find bra's that had huge pads in them to make my chest not look so boney. Bathing suits were another matter. I had pads that stayed wet forever, and never did look like anything but triangular pads! When I turned 40, I took a look at myself and while I stay fit and go to the gym, the lack of a chest bothered me. My breasts looked deformed, they were so flat.

I found Dr. Wooten on the internet and after reading her credentials' and the photos of her work, I contacted her about breast augmentation. She was so friendly and professional. I was impressed that she wasn't a bigger is better Doctor. She talked to me like she really wanted me to look my best and that she would be able to provide that look. Her office staff was wonderful as well, and very accommodating.

I had 300cc. saline implants placed submuscular. This provides me with a cup size of a B/C. I finally fill out blouses without padding. Bathing suits fit great and I feel wonderful.

The procedure and recovery itself was much better than I had anticipated. There was minimal discomfort and the sensation in my breasts came back quickly. I have very little scarring around the areola. I am very pleased with the look and feel of my breasts.

Dr. Wooten did a fantastic job, and I thank her for it!
