

Dear Dr. Wooten,

This letter comes to you with many emotions. The experiences I had with breast cancer that brought me to this renewing healthy place in my life have so much to do with you. You have a God given skill and a genuine caring nature for your patients as well as your constant confident persona as a Doctor-which have enhanced my life in so many ways.

When I found out that I had Breast cancer at 44 years of age it was almost incomprehensible to understand how drastically my life was going to change-I knew it would never be the same in many ways. But, when we were introduced and we consulted about my double mastectomy with reconstruction your confidence and care was overwhelming. But most of all the reassurance that you portrayed to me in your abilities to reconstruct my breast put me at ease almost immediately and still does to this day. Receiving your professional and expert care on this most delicate matter and knowing that it was going to be a long road, I had every confidence in putting my body into your skilled hands to make me whole again. For me and my personal experience, I can say that you are a gift from God to women who find themselves face to face with such a life threatening illness.

Now two years later my reconstructed breasts, nipple reconstruction and the tattooing for the areola-look absolutely amazing! You are truly a gifted Doctor in the art of plastic surgery! Most of all I feel lucky enough to know you and consider you a wonderful friend for life. This is what you gave to your patients-trust and most of all what you gave to me was my life back as a whole women and for that I am forever grateful to you!

With many joyful emotions I sign this letter to you at the end of my journey.....

Love from the bottom of my heart.

D.R.
