

Dr Wooten,

There must be a reason we trust in our instincts. I think its because they are usually right. The moment I entered your office and met you & your staff I knew that I wanted you to be my surgeon. Thank you so much for fixing my nose, both on the inside & outside. Not only can i breath but i love the appearance of it. I have struggled with this insecurity for so long but not anymore thanks to you. It was obvious to both myself & my family that you care about your work & your patients very much. I cant say it enough-
Thank You!

MH
